Introducing the NEW 3M™ Cubitron™3 Flap Disc

Designed To Boost Productivity And Efficiency!

Cubitron™ 3 Flap Disc 1169F stands out as one of our top-performing abrasive discs, designed for both adaptability and cost-effectiveness. Featuring 3M Precision-Shaped Grain, now redesigned with curved edges, it offers greater durability and faster cutting compared to any other shaped grain, traditional aluminum oxide, or alumina zirconia flap discs, while remaining user-friendly and providing the extended lifespan needed for daily use.

This unmatched blend of efficiency and affordability can boost your productivity and reduce your abrasive costs simultaneously.

Applications: • Weld grinding • Light grinding • Beveling • Deburring • Blending
• Finishing • Surface preparation • Scale removal • Weld spatter removal • Work on edges and contours

The new MultiTOOL program from EMUGE-FRANKEN provides a comprehensive drilling, tapping, and thread milling solution for customers cutting a broad mix of materials.

The MultiTool Program is ideal for job shops that:

- ☑ Need to produce a wide range of parts with varying specifications.
- ☑ Want exceptional precision, reliability... and value.
- ☑ Would like to reduce tool inventory. Using a single tool to cut multiple materials can reduce the number of tools needed, freeing up space and lowering overall tooling costs.

MultiDRILL™

- **High-Performance Choice:** The EMUGE-FRANKEN MultiDrill is ideal for job shops managing everyday drilling tasks.
- **Solid Carbide Construction:** Made from high-quality solid carbide, excelling in various materials for longer tool life.
- **Improved Productivity:** Enhances productivity through its multipurpose design.
- **Precision Engineering:** Features self-centering capabilities and concave cutting edges for better stability and accuracy.
- **Versatile Length Options:** Available in lengths of 3X D, 5X D, and 8X D, suitable for diverse manufacturing applications.

Also available: MultiDRILL® Micro for high-performance drilling under 3 mm.

One Drill. Multiple Materials.

MultiTAP™

- **Transformational Solution:** EMUGE-FRANKEN MultiTAP enhances threading operations by boosting productivity and reducing costs.
- **Versatile Range:** Offers high-performance multipurpose taps, including cut and form options, in various lengths and coatings.
- **Material Compatibility:** Handles diverse materials like carbon steel and aluminum.
- **Precision Performance:** Delivers dual thread fits (2B and 3B) from a single tap, streamlining inventory needs.
- **High-Quality Results:** Ensures superior thread quality for numerous applications.

The Industry's Broadest Line of Multi-Purpose Taps

MultiTHREAD™ MILL

- **All-in-One Solution:** The EMUGE-FRANKEN MultiTHREAD Mill is designed for efficient thread milling in job shops with changing materials.
- **Reduced Inventory Needs:** Minimizes the need for multiple thread mills, enhancing operational efficiency.
- **Durable Design:** Features robust construction with EMUGE's TIN T21 coating for extended tool life.
- **Versatile Performance:** Provides effective cutting across a broad range of sizes and thread types.
- **Cost Optimization:** Optimizes production capabilities and reduces operational costs, making it vital for machining environments.

Thread with Maximum Confidence, Depth, Versatility and Economy

Emuge Offers a Wide Range of Solutions Tailored to Meet Your Specific Needs

Seco New Additions to the Seco Tools Lineup!

SD5402 & SD5301 Indexable Insert Drills

The SD5402 large indexable insert drill is the latest evolution in our drilling solutions, replacing the SD542. This upgrade brings enhanced performance and reliability, thanks to a new Perfomax® design and improved manufacturing processes. If you are looking for a large diameter drill, the SD5402 offers similar benefits with the indexable inserts but with the added advantage of exceptional chip flow and stability.

Alongside this, we're introducing a new addition, SD5301, to our lineup. The SD5301 features an extra short drill body, specifically optimized for mid-size turning machines where longer drills are often impractical.

With these two options, you can choose between a proven replacement for your existing large diameter drilling needs and a new solution designed for stability and precision in more compact setups.

NEW!

High Feed SP07 Versatility for modern milling

If you're tired of swapping tools for every job, the SP07 is your go-to for all kinds of milling, from steel to stainless and superalloys. For side milling to slotting and pocketing to plunging. It's built for unmanned production and high performance, freeing up your time to focus on other things.

A smart choice for cost savings

Each insert has 4 edges, so you get more value out of each one. Plus, with high metal removal rates, even with a depth of cut as shallow as ≤ 0.8 mm (0.03"), you won't be slowed down. Less downtime and fewer replacements mean more money saved.

Future-proofed high feed milling

You don't need to be a pro to run this tool. The Data Matrix codes offer access to cutting data, and traceability via the Seco Assistant App. This makes it perfect for high-volume or unmanned operations.

PROTECT OUR PLANET!

Seco's Used Carbide Recycling Program

What can be recycled?

Cemented carbide inserts, solid drills, solid end mills, PCD/PCBN (tipped inserts only) and wear parts are all suitable for recycling.

Seco continuously supports more sustainable processes, that also generates a return for you as a customer while safe-guarding our planet for the next generation of manufacturers.

Easy to handle

Seco will supply you with recycling bins for you to collect your worn-out carbide tools. When the bin is full, you log into your MyPages account to get a price estimate and shipment details to one of the Seco's certified recycling plants.

Participate and get paid

Seco will recycle any carbide product, including bars and anvils, but no steel, ceramic or cermet. Upon receipt the used carbide will be sorted and weighed, and you will be compensated.

High Feed 07 Inserts With 4 Cutting Edges

Each insert has four cutting edges, so you get more use out of each one. The stable insert design and constant lead angle give predictable cutting behavior, and the high metal removal rates, even with a depth of cut as shallow as ≤ 0.8 mm (0.03"), mean you won't be slowed down.

NEW!

ER HP Collet Chuck

With our ER HP collet chuck, you'll notice your machining processes become smoother and more reliable. The real benefit? Because of the excellent run-out, you'll get consistent results, longer lasting tools and faster cycle times, ensuring your operations are both efficient and cost-effective. This means less downtime and reduced tooling costs that give you a clear advantage.

Call your local SB Simpson for additional information!

5" Master Polishing Kit

5" Master Polishing Kit is a complete system that includes our DB8 Polisher, compounds, foam pads, and microfiber wipes. Working together as one seamless detailing system.

Security Check Paint Markers

Paint marks crack for visual indication of loosening or tampering of bolts and parts.

If movement occurs from vibration, loosening, or tampering, the paint mark cracks, making changes immediately visible during inspection.

Built for demanding industrial use, it performs in harsh conditions where equipment safety and fastener integrity are critical.

Each tube packed with extended plastic tip
Dry to touch: 15 minutes

Compliance Solutions**
We are here to help!

Protecting Workers, workflows & costs with Lockout Tagout

Keeping your machines running keeps your business moving. But required maintenance means lockout tagout procedures must be followed to keep your employees safe. Whether you're starting your lockout tagout program from scratch or taking your program to best in class, Brady can help every step of the way.

Lockout Tagout Kits

Lockout kits are equipped with the tools you need to isolate mechanical and electrical control points.

Lockout Tagout Stations and Cabinets

These stations are portable or static and work for just about any application.

Compliance-driving Products

Individual Safety Padlocks, hasps, tags, electrical, valve and hose lockout devices available for circuit breakers, panels, valves and electrical equipment.

**Be lockout-ready with helpful kits and stations stocked
with durable, priced-right devices and padlocks**

Mark The Unmarkable With LED Sign And Line Projectors

Brady LED projectors offer a maintenance-free solution with durable industrial construction, waterproof designs, and long operating life. They provide a flexible alternative to paint and floor tape while helping organizations improve safety, efficiency, and professional facility appearance.

Ideal For Changing and Challenging Areas

- Project dynamic warning signs, pedestrian crossings, forklift traffic alerts, and restricted-area indicators.
- Improve awareness in high-traffic environments.

Reduce Maintenance Costs

- Eliminate repeated repainting and floor tape replacement.
- Long-lasting LED technology reduces upkeep and downtime.

Adapt to Changing Operations

- Easily update messages and markings as workflows evolve.
- Ideal for temporary zones, seasonal operations, and facility reconfigurations.

Superior Visibility

- Bright, high-contrast projections remain visible in dusty, humid, uneven, or high-traffic environments where conventional markings deteriorate.

Call your local SB Simpson for additional information!

Adhesive backing minimizes risk of tripping

Spilfyter Universal Traction Mat

Easy, durable solution to combat slips, trips & falls in a variety of locations.

- * Rugs withstand heavy foot and vehicle traffic, to include fork trucks.
- * The bottom layer sticks to the ground/surface using Cling technology.
- * Simply peel rugs up and re-position as needed.
- * Durable top layer can be vacuumed, swept with broom or mopped - allowing it to stay in use longer.
- * Easy to use: roll out continuous walk-off coverage for entrances and walkways with no gaps, ripples or overlaps that can be slip, trip or fall hazards.
- * ADA compliant for wheelchairs and walkers.
- * Absorbs a wide variety of oil and water-based spills.

Maximum cut-resistant jacket for comfort and full upper body protection

Maximum Cut-Resistant Jacket

Our Superior® CAJX jacket offers maximum upper body cut protection. Made with TenActiv™ engineered yarn for 360° cut protection with maximum ANSI A9 cut resistance, the jacket is breathable and lightweight for all-day comfort, protecting the torso and arms from collar to waist. It features thumbholes to help secure the sleeves in place and is ideal for use where torso and arm cut hazards exist.
Sizes S - 5XL #CAJX

Applications: Automotive, Glass Handling, Manufacturing, Metal Fabrication, Recycling

\$319

Waterproof protection for handling extremely cold cryogenics

Waterproof Cold Cryogenics Protection

3M Thinsulate™ insulation protects hands from extreme cold of cryogenics. RaoTex™ inserts prevent cryogenics from soaking through to the skin and act as an added insulator, trapping body heat while allowing moisture to escape. Ideal for handling vaccines at -80° C / -112° F in storage. Features an extended cuff for added protection. Loose-fitting structure allows for easy removal in the case of contact with cryogenics.

This glove is not for full immersion in liquids.

Sizes: S/M, L/XL #635CRYO

Applications: Cryogenics, Food Processing, Laboratories

\$45⁹⁵ /pr

TenActiv™ Vibration Dampening Cut-Resistant Gloves

Vibration-dampening gloves with protection against cut hazards. Vibration-dampening padding for protection from vibration hazards; reinforced with TenActiv™ thread for added seam integrity. TenActiv™ engineered yarn provides 360° cut protection with ANSI A5 cut resistance. Micropore nitrile palm coating offers steady wet grip.
Sizes: XS - 3XL #STAGPNVPI

\$11⁹⁵ /pr

Chainsaw Kickback Hi-Viz Protection Gloves

Hi-viz protection against chainsaw kickback injuries.

Multi-layered woven ParaActiv™ fiber wraps around a chainsaw's drive sprocket to halt it at the moment of contact.

Hi-viz back-of-hand for hand placement awareness and worker visibility on the job. Elasticized wrists secure the fit and keep debris at bay.

Sizes: M - XL #385CS

\$35⁰⁰ /pr

Endura® Slim-fit WELD Gloves

Ladies Designed for MIG welding and all-round fabrication with arc flash protection.

ParaActiv™ engineered yarn liner for 360° cut protection with ANSI A4 cut resistance and ANSI 3 heat protection

Arc flash-rated level 3 with an Arc Thermal Performance Value (ATPV) of 36 cal / cm²

Extended gauntlet cuffs offer added wrist safety

Sizes: XS - M #399GKGL5L

\$20⁹⁵ /pr

Reusable 6000 Series Full Face Respirators

Features a large polycarbonate lens, soft, silicone faceseal and 3M™ Cool Flow™ Exhalation Valve. The 6000 Series is NIOSH-approved to protect against certain airborne contaminants when used with 3M bayonet-style filters and cartridges.

\$243
